Small entities that provide auto servicing work have unique pollution liability needs. Often, these small entities can only find limited add-on pollution liability coverage which doesn't fully meet their needs or traditional pollution liability policies which are expensive and beyond what is needed.

Amwins Program Underwriters' Auto Dealer's Pollution program offers standalone site pollution liability coverage in conjunction with an "A+ XV" rated carrier. This program serves as a streamlined alternative for small auto servicing entities to easily obtain site pollution liability coverage that is designed to fit their operation's unique needs.

Pollution liability needs

Not enough

Limited add-on pollution liability coverage

Too much

Traditional pollution liability policies

Right size

Auto Dealer's Pollution is designed to meet the needs of small auto servicing entities
