A premier provider of insurance to the recycling industry

Amwins Program Underwriters' RecycleGuard program caters to the unique exposures and risk handling needs often faced by recycling operators. Over the last 25 years, we have gained first-hand knowledge that comes from visiting facilities and learning how the day-to-day trade works, which is the key to understanding the recycling industry's unique risk exposures.

Since 2000, RecycleGuard has been the only property & casualty insurance program sponsored by the Institute of Scrap Recycling Industries (ISRI).
